Subject Index

- AIDS 321
 alphavirus 121
 amyotrophic lateral sclerosis (ALS) 17
 anergy 63, 238
 anti-ganglioside antibody 20
 anti-viral immune responses 167
 anti-viral immunity 189
 arbovirus infection, antibody 127
 arboviruses 121
 -, CNS 121
 -, cytokines 125
 -, inflammation 125
 arthritis 363
 -, superantigens 363
 -, *S. aureus* 364
 autoantigens, epitope mapping 62
 autoimmunity 61, 367
- B cell hyperplasia 285
 -, superantigens 285
 bacteria 283
 bronchiolitis 189
- Collagen and adjuvant arthritis 69
 conductor block 17
 coronavirus 133
 -, feline 134
 -, immunology 133
 -, immunopathology 133
 -, pathogenesis 139
 cytokines 236
 -, arboviruses 125
 cytomegalovirus 324
 cytotoxic T cells 247
- Demyelination, virus-induced 136
 diabetes 70, 333
 -, superantigens 333
- Experimental autoimmune encephalitis (EAE) 68
 epitope mapping, autoantigens 62
 Epstein-Barr virus 203, 295
 experimental allergic neuritis 34
- Feline coronavirus 134
 flavivirus 121
- Guillain-Barré syndrome 29
 -, clinical aspects 37
 -, immunology 29
 GvH disease, viral superantigens 291
- Heat shock proteins (hsp) 110
 hepatitis B virus 149, 261
 -, humoral immune response 149
 -, pathogenesis 149
 -, serology 150
 -, tolerance 158
 hepatitis, LCMV 252
 HIV 296
 -, superantigens 296
 HIV-1 321
- Immune responses 167
 -, anti-viral 167
 -, RSV 191
 immunodeficiency 231, 319
 inflammation 125
 -, arboviruses 125
- Kawasaki syndrome 385
 -, superantigens 385
- Lactate dehydrogenase-elevating virus 167
 Lambert-Eaton myasthenic syndrome (LEMS) 3
 -, autoimmunity 5
 -, paraneoplastic disorders 4
 lymphocytic choriomeningitis virus (LCMV) 247
 -, hepatitis 252
 -, immunopathology 249
 -, immunosuppression 253
 lymphokines 262, 267
- MHC class II molecule 367
 motor neuropathy 17
 mouse AIDS (MAIDS) 231, 326
 -, viral superantigens 293
 multiple sclerosis (MS) 71, 107, 221
 -, γ/δ T cells 111
 -, autoantibodies 97
 -, autoimmunity 83
 -, cytokine activity 96
 -, demyelination 79, 91
 -, humoral immunity 97
 -, immunological concepts 77
 -, immunopathology 89
 -, oligodendrocyte destruction 79
 -, stress proteins 110
 mycobacteria 375
 myelin basic protein 62
- Neuro-SLE 47
 -, cardiac emboli 54
 -, cytokines 50
 -, hematologic changes 54
 -, immune complexes 50
 -, coagulopathies 54

- Persistent virus infection** 167
polymerase chain reaction (PCR) 320
protein engineering 399
- Rabies virus, superantigens** 307
respiratory syncytial virus (RSV) 187
-, immune responses 191
-, vaccines 189
retroviruses 293
-, superantigens 293
rheumatoid arthritis (RA) 71, 208
- S. aureus arthritis** 364
simian immunodeficiency virus (SIV) 325
Sjögren's syndrome 216
small cell lung carcinoma 3
Staphylococcus aureus enterotoxin A (SEA)-
 structure 401
staphylococcus 387
streptococci 387
stress proteins 107
-, CNS myelin 114
-, CNS 108
-, immune responses 108
superantigens 283
-, arthritis 363
-, B cell hyperplasia 285
-, diabetes 333
-, immunodeficiency 320
-, Kawasaki syndrome 385
-, rabies 307
-, retroviruses 293
-, tuberculosis 375
systemic lupus erythematosus (SLE) 43,
 218
-, immunopathogenesis
-, -, autoantibodies 44
-, -, immunoregulation 44
-, -, self-tolerance 44
-, murine 46
-, neurologic dysfunction 43
systemic sclerosis 220
- T cell receptor V β (TCR V β)** 363
T cell receptors 319
T cells 61, 149, 261, 387
tolerization 64
transgenic mice 261, 267
tuberculosis 375
-, superantigens 375
tumor therapy 397
-, superantigens 397
- Uveitis** 69, 72
- Vaccines, RSV** 189
viral hepatitis 261
viral immunodeficiency, pathogenesis 321
viral infection 189
viral persistence 271
virus 283
voltage-gated calcium channels 4
